

**June 22nd 2015**

**INSTALLATION ADVISORY IA E-04.3**

**Replacing the E-04R retrofit kit in aircraft with the model E-01 installed**

- 1. Read the manual first.**
- 2. Disconnect the coax cable and remote cable from the ELT and remove it from the aircraft.**
- 3. Install the E-04 ELT in the existing mounting tray and reconnect the coax and remote cable.**
- 4. Disconnect the coax cable from the E-01 antenna and remove it replace it with the E-04.8 antenna and static suppressor and connect the coax cable.**
- 5. Unplug the remote cable from the remote control and plug it into one end of the audio alert unit insert the 1 foot jumper cable into the audio alert and then plug into the remote control.**
- 6. Remove the two nuts from the pushbutton switches on the remote then install the new 406 MHz placard over the old E-01 placard and replace the nuts. Make sure to remove the clear protective film from the new placard before installing it.**
- 7. Follow all installation instructions in the manual the same as new install.**

**If you wish to connect to the aircraft GPS follow the instructions in the manual.**
